Address: Følfodvej 238, Copenhagen S 2300

Copenhagen, Denmark

Entry-level Data Analyst with skills in Python, SQL, Excel, and data visualization, Hands-on experience from an AI Research Internship at Digital Ops, where I worked with data cleaning, analysis, predictive models, and dashboard evaluation. Strong academic background in statistics, process mining, and social data analysis, with a focus on extracting insights and supporting data-driven decision-making.

Work Experience

AI & UX Research Intern | June 2025 – Present | Digital Ops, Copenhagen , Denmark

- Evaluating adaptive learning dashboards with multimodal data (clickstream, logs, behavioral signals).
- Analyzing and visualizing datasets in Python to assess predictive models (BKT, DKT, regression, clustering).
- Conducting UX research and usability evaluations to improve dashboard design and user engagement.
- Presenting insights through dashboards and reports for technical and non-technical stakeholders.

Front End Developer | 2021–2023 | Brixoptim, Dhaka Bangladesh

- Built and maintained responsive UIs with HTML, CSS, Bootstrap, Tailwind, and JavaScript.
- Optimized user experience with mobile-first design and cross-browser compatibility.
- Managed workflows with Git, debugging, and usability testing.

Education

MSc in Computer Science and Engineering

Technical University of Denmark (DTU) | 2023–2025

Relevant coursework:

Computational Tools for Data Science, Social Data Analysis & Visualization, Intro to Machine Learning & Data Mining, User Experience Engineering, Data Security & System Security.

BSc in Computer Science and Engineering

Green University of Bangladesh | 2017 – 2021

Relevant coursework: Database Systems, Data Structures, Probability & Statistics, Numerical Methods, Software Development & Testing. Programming Python, database management, statistical methods, and problem-solving.

Skills

- Data Analysis: Python, Jupiter, Note, data cleaning & wrangling
- Visualization: Dashboards, charts, storytelling with data
- Predictive Analytics: Regression, classification, clustering
- Data Governance: Security, privacy, compliance basics
- User-Focused Design: Presenting insights through clear, actionable visuals

Language

- English
- Danish (Learning)
